

Mesa™ HP

Diode pumped Nd:YAG laser

The Mesa HP Nd:YAG laser is designed to accomplish demanding tasks for a broad range of industrial and OEM applications. Our pumping technology and stable optical resonator design produce a laser beam with uniform energy distribution and high output power.

The high-quality profile, combined with high pulse energy and repetition rates, provide an ideal laser beam for micromachining applications.

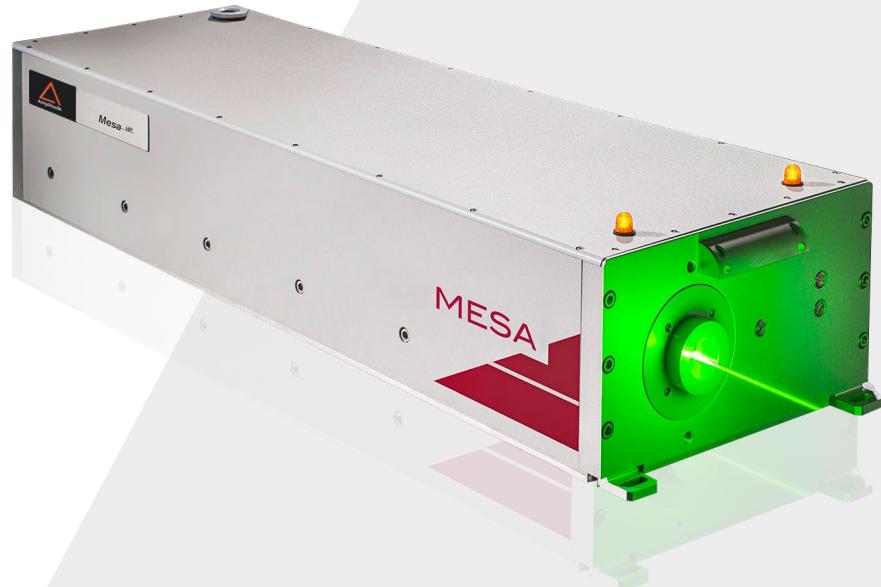

Applications

- Industry:**
 - > Stent/Glass/PCB/Fine Metal Cutting
 - > LCD/Solar Edge Deletion
 - > Marking
 - > Wafer Trimming
 - > Micro-hole Drilling
 - > Ceramics Scribing
 - > Fine Wire Stripping
 - > Diamond/Gemstone Processing

- Science:**
 - > Ti:Sapphire pumping
 - > Particle Image Velocimetry
 - > Combustion Analysis
 - > Laser Induced Fluorescence
 - > LIDAR
 - > Resonance Raman Spectroscopy
 - > Chemical Analysis of Macromolecules
 - > Laser Microprobe Analysis

Key Features

- > 1064, 532, 355 nm operation
- > Smooth and symmetrical beam profile
- > Highly efficient wavelength conversion
- > First-pulse suppression for consistent material processing
- > Compact & rugged package designed for 24/7 operation
- > Record 3 min. diode module replacement with no realignment necessary
- > Proprietary optical cavity design for optimal beam quality

Specifications¹

	1064-220-M	1064-180-L	1064-150-M	532-150-M	532-120-L	532-100-M	355-40-M
Wavelength		1064			532		355
Power CW (W)	220	180	150		n/a		
Power at 10 kHz (W)	180	150	120	150	120	100	32
Power at 6 kHz (W)	150	120	100	120	100	80	40
Repetition Rate (kHz)		1-40			1-30		1-20
Pulse-to-Pulse Stability (% RMS) ¹	< 2	< 3	< 2	< 2	< 3	< 2	< 2
Pulsewidth (ns)	< 130	< 150	< 170	< 120	< 130	< 170	< 170
Beam Pointing Stability (μ rad RMS)				< 25			
Beam Diameter (mm) ^{2, 3}		2.5			2.6		
Beam Divergence (mrad) ²	11	9	11	9	8	9	6
Beam Quality (M^2)	< 25	< 12	< 25	< 30	< 15	< 30	< 35
Polarization ⁴		Random			V 100:1		

¹ All specifications at 6 kHz unless otherwise noted.

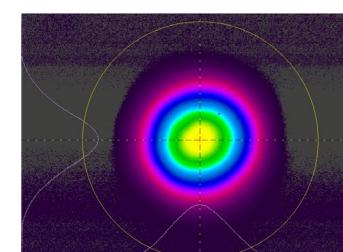

² Typical measurement ($\pm 10\%$)

³ Measured at $1/e^2$ points of Gaussian fit to beam profile

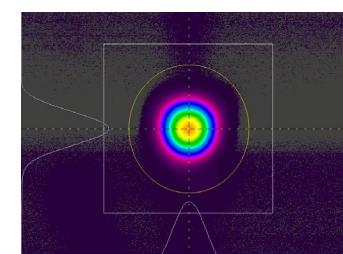

⁴ V=Vertical. Factory default (can be changed upon request)

All dimensions are in inches (mm).

Side View Power Supply

Side View Chiller

Dimensions

Optical Head (LxWxH) 812 x 254 x 145 mm (31.9 x 10.0 x 5.6 in)

Power Supply (LxWxH) 509 x 483 x 221 mm (20.0 x 19.0 x 8.7 in)

Chiller (LxWxH) 699 x 483 x 492 mm (27.5 x 19.0 x 19.4 in)

Weight

Optical Head 31.5 kg (70 lbs)

Power Supply 27 kg (60 lbs)

Chiller 65 kg (144 lbs)

Electrical Service

Power Supply Single-phase: 200-240 VAC, 50/60 Hz
operating current: 10A, max current: 20A

Chiller Single-phase: 230 ±10% VAC, 50/60 Hz
operating current: 12A, max current: 20A

Temperature & Humidity

Operating Temperature 15 to 35° C

Storage Temperature -20C to 50° C

Relative Humidity 8-80%, non-condensing

Control Interface

User Interface Full featured front panel control

Serial Interface RS-232, ethernet

Rear Connections External beam enable, external trigger,
analog current control, analog RF attenuation
control, digital alert output

Control Software MS Windows-based Laser Commander™

Others

Umbilical Length 3.65 m (12.0 ft); longer available upon request

Cooling Air-water; water-water cooling option available
